Minimal Impacts

Moderate Impacts

Severe Impacts

# **WEATHER KEY POINTS**

**04/10/22 - 04/16/22**

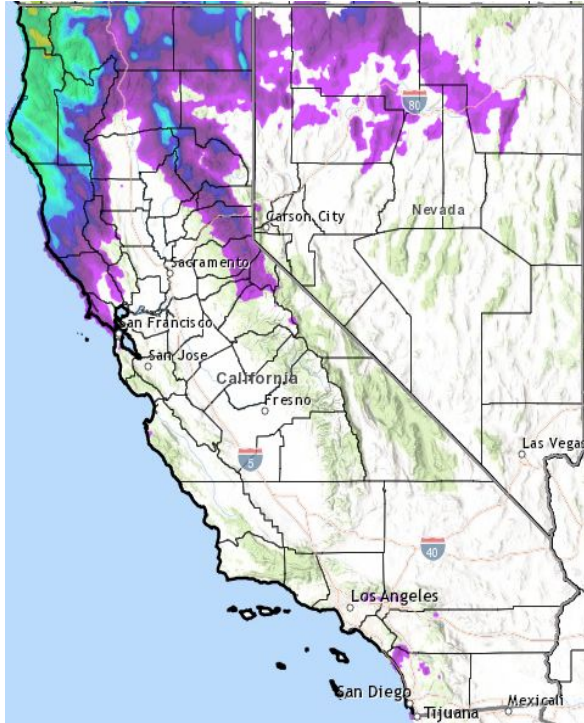

## **Sunday - Saturday**

- Gusty winds of 40-60 mph are expected to continue through early Tuesday, especially for portions of the Sacramento Valley and central foothills, the Sierra and northern Mountains, and across the mountains and desert areas of southern California.
  - Critical fire weather conditions are expected across the Sacramento Valley on Sunday due to the strong winds and dry conditions. Any new fires could spread quickly.
  - Strongest winds are expected Monday and Monday night, with gusts of 60-80 mph possible along the wind prone areas and upper foothills and ridges.
- Rain and mountain snow expected at times for mainly the northern half of the state Sunday night through Friday.
  - Travel impacts are possible in the northern California mountains and the Sierra due to accumulating snowfall, especially Monday through Tuesday morning
    - Snow levels down to 2000 ft are possible starting late Sunday night in northern California, with snow levels down to 4000-5000 ft for the Sierra
  - Some light precipitation is also possible for coastal southern California on Monday, though no widespread impacts are anticipated
  - Isolated thunderstorms with gusty winds and small hail are possible on Monday across central and northern portions of the state

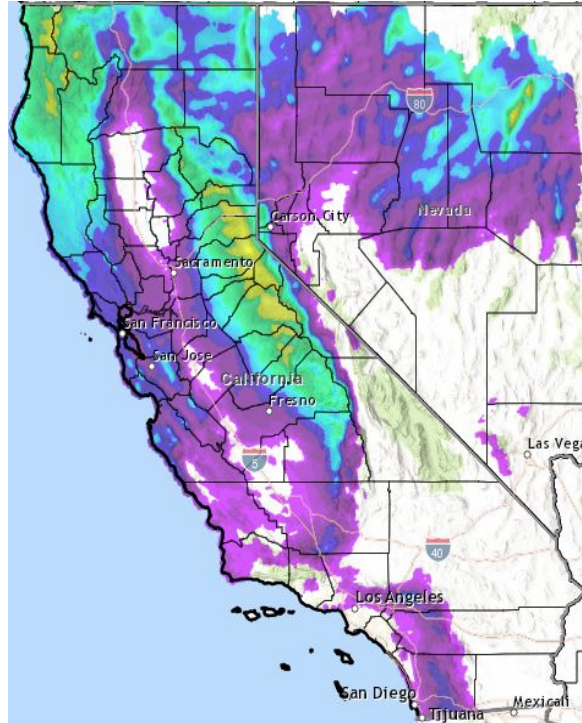

# PRECIPITATION FORECAST

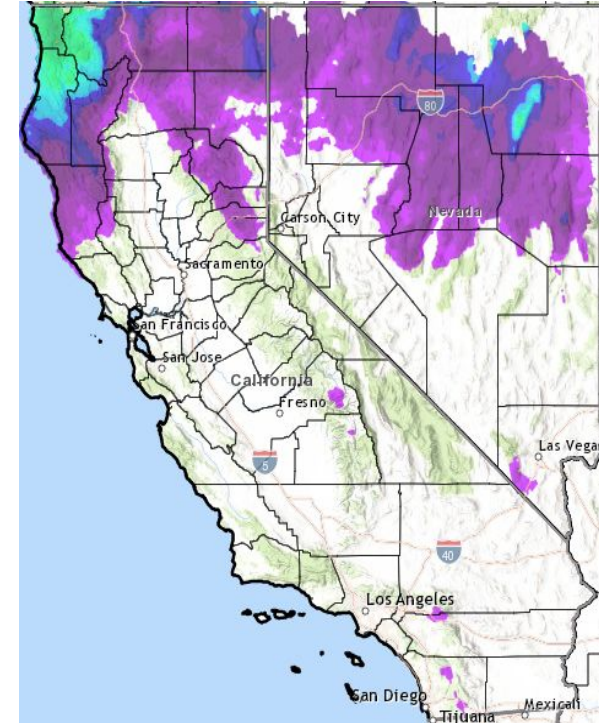

04/10/22 - 04/12/22

**Sunday**

**Monday**

**Tuesday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**04/15/22 - 04/23/22**

## **6-10 Day Outlook (April 15 - April 19)**

### **Temperatures**

- Below normal temperatures are favored across much of the state, with near normal temperatures favored along the southern coast

### **Precipitation**

- Below normal precipitation is favored across much of the state, with near normal precipitation favored across far southern California

## **8-14 Day Outlook (April 17 – April 23)**

### **Temperatures**

- Above normal temperatures are favored across much of the state, with near normal temperatures favored for far northern California

### **Precipitation**

- Below normal precipitation is favored statewide, except for near normal precipitation favored across northwestern California and also across far southern California
